

Perspirex

Roll-on & Hand and Foot Lotion

Seriously reliable protection against excessive perspiration and odour.

So effective, one application will work for 3-5 days.

Perspirex is clinically proven to provide lasting protection against sweat and odour. No sweat, no smell.

HOW TO USE PERSPIREX:

- Apply Perspirex at night before going to bed as the sweat glands are less active at night. Use Perspirex every night until you have achieved the desired effect (usually within 1 week). For sensitive skin apply every second night for two weeks.
- Allow Perspirex to dry fully after application.
- Wash off in the morning with soap and water. Do not re-apply. You can also apply a regular scented deodorant or perfume should you wish.
- Maintain sweat and odour control by applying Perspirex 2-3 nights per week, or as often as needed.
- Apply Perspirex Roll-on with 2 strokes up and down in the centre of the armpit. The skin must be completely dry and unbroken.

Apply Perspirex Hand and Foot Lotion to the palms of your hands and the soles of your feet. If necessary apply Perspirex Hand and Foot Lotion to the sides of your fingers. The skin must be completely dry and unbroken.

PLEASE NOTE:

- The skin must be completely dry before application. Use a hairdryer at a cool setting, if necessary
- Never apply Perspirex on damaged/irritated skin. Do not use Perspirex

for 48 hours after shaving, waxing or use of depilatories. For external use only; avoid contact with the eyes and other mucous membranes.

- In rare cases Perspirex may cause skin irritation or an allergic skin reaction. If this occurs, discontinue use.
- Do not use on children. Perspiration problems rarely occur before puberty.
- Perspirex may discolour and perish the fabrics you wear on the night of application. Avoid contact with jewellery and other polished metal surfaces.

CAUTION:

Stinging and itching may be experienced if

- the skin is not completely dry and intact before application.
- you do not allow Perspirex to dry fully after application.
- you apply too much of Perspirex.
